CHAMPION AND RESERVE AT SOLANCO FAIR are shown left to right above. Kenneth Rutt holds Fred Linton Jr.'s Hereford steer "Rocky" which topped the 36-head field in the county's initial steer show of the season. Kathy Weaver is shown with her reserve Angus, "Bo Bo". Both animals are 4-H steer projects. L F. Photo

Solanco Opens Fair Season Featuring Youth In Dairy, Hog & Steer Show Events

DAIRY SHOW

Earl Wenger, 17-year-old Quarryville R1 youth, led the 25-head Holstein division, showing his five-year-old cow to the breed championship at the Solanco Fair Junior Dairy Show on Wednesday. The reserve title was taken by a 2-year-old Holstein shown by Kenneth Rutt, Quarryville R2 Entries in the Holstein division represented the largest group in the 43-head show

The Guernsey show was won by a three-year-old cow shown by Earl Mull of Quarryville R1, with the reserve championship going on a two-year-old entry of Larry Breneman of Strasburg R1.

Jay Marvin Herr of Holtwood R1, showed the grand champion Jersey, a four-year-old 4-H entry that was state breed champion last year The reservist was a senior yearling exhibited by Nancy Kreider of Drumore R1.

James Esbenshade of Quarryville R2, had the top Ayrshire, a senior yearling, with Carl Weicksel of Oxford R1, taking the Brown Swiss title with a junior yearling heifer.

Judge in the fair's opening feature was Robert Hetrick,

Seldomridge Is Reelected ASC Committee Head

Thirty-five delegates to the Lancaster County Agricultural Stabilization and Conservation Service convention Monday night returned Fred G. Seldomridge to his fourth term as committee chairman. Seldomridge, a dairy farmer from Gap R1, has held this post since 1962.

John J. Herr, Mount Joy R1, was named to a two-year

County Finds Few Bright Spots At Pennsylvania Jr. Dairy Show

HARRISBURG — County showmen in the 4-H and FFA Junior Dairy contest here on Monday were among 557 Pennsylvania youngsters who paraded their animals before the critical eyes of the judges in the large arena of the Farm Show Building.

The only major wins for Lancaster youths in the Junior Dairy Show were in FFA Holstein judging, and in that class they took four of the six championships. David Zimmerman, 19-year-old son of Mr and Mrs John M. Zimmerman of Reinholds R1, scored twice with the reserve senior and reserve grand champion titles Zimmerman, a graduate of Ephrata High School and a member of the Cloister FFA Chapter, showed a five-year-old cow, Lady Ivanhoe Joan-Twin, which had finished third in her class in the southeastern district show.

Clifford Bollinger, son of Mr and Mrs. Abram Bollinger of Lititz R4, came through with the FFA Holstein junior champion She was a senior calf named Garwood Londa. Clifford is a senior at Ephrata High School and a member of the Cloister Chapter. He will represent the Pennsylvania FFA in national cattle judging competition at the American Dairy Congress at

(Continued on Page 5)

DAVID ZIMMERMAN, 19, of Reinholds R1, holds his five-year-old Holstein cow, Lady Ivanhoe Joan-Twin, which won the reserve grand champion and reserve senior champion honors in the Future Farmers' division at the Pennsylvania Junior Dairy Show in Harrisburg on Monday. At right, holding Lady Ivanhoe's new rosette, is Pennsylvania's Dairy Princess, Linda Forba of Tunkhannock. David, a member of the Cloister FFA chapter at Ephrata High School, also won a Master Showman award in displaying his winning entry. He is the son of Mr. and Mrs. John M. Zimmerman of Meadow View Farm, near Reinholds.

SWCD Directors Plan For Annual Dinner Meeting

The Lancaster County Soil and Water District directors held their monthly meeting at the county courthouse on Monday night Among other business discussed was the matter of the site and speaker for the district's annual meeting in March Since last year's meeting was held in the southern end of the county, it was felt that this year a more

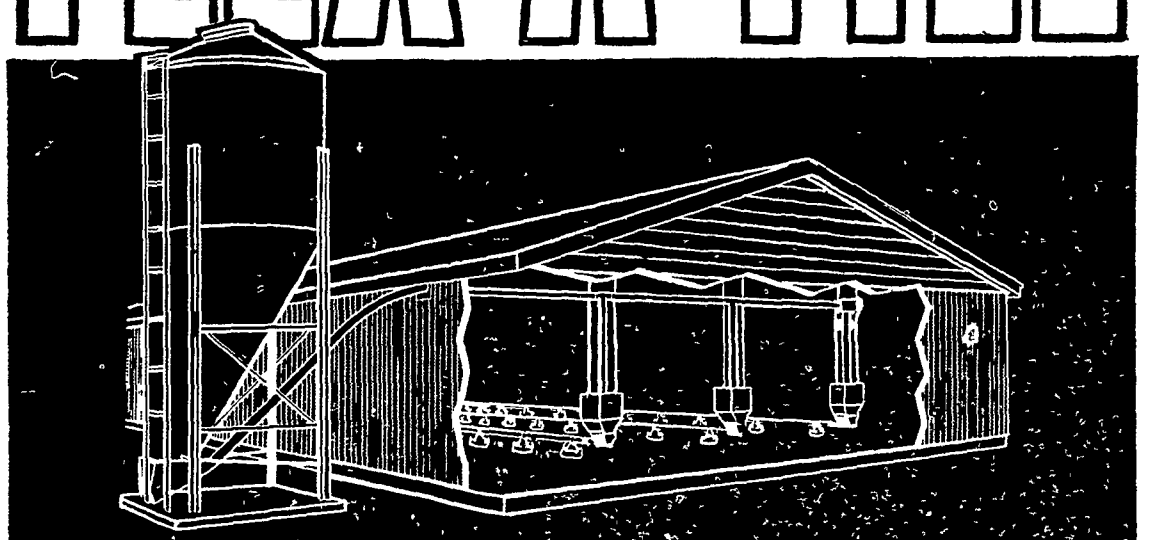
FLEX-A-FILL



Climbs, turns, fills without universal joints

This new flexible auger system operates without gears and from only one power source. Feed moves up, down or around 90 degree corners to locations over 100 feet away! Just put feed in bulk bin . . . system operates automatically only when needed . . . and there are no joints to clog up.

Auger system has very low horsepower requirement, yet operating at a standard speed of 312 rpm, it will deliver about 1800 pounds of pellet feed . . . or 1500 pounds of mash feed per hour!

Bin fills easily . . . empties completely

Fill it and forget it because its weather-tight construction assures content safety until the bin is empty. "All-Out" bottom empties completely, prevents bridging . . . no internal braces to jam contents and stop feed flow. Caulked seams, neoprene washers, heavy gauge galvanized steel give long rust-free life. Available in side and center-draw models.

From Where We Stand . . .

Service With A Smile!

How often do you reevaluate your work? As farmers producing at least one major product you have to do this periodically. Those persons and industries rendering a service to farmers must also take stock occasionally, if they are to continue providing the quality of service the farmer needs.

The other day a non-farm friend, who was not familiar with Lancaster Farming, asked a very simple and important question — "what service does your paper provide?" Although we try to take a fresh look at that question frequently all too often service industries get so involved in performing their service and go too long without reevaluating.

But to answer that person's question, we started making a list of the services we feel we are performing. We won't hit you with the full list, but here are a few of the more important items we came up with:

1—Market reports on eggs, poultry, and livestock — some are weekly summaries, but most are the latest closing prices.

2—Feature stories on business farmers and rural youth.

3—Reports on the activities of local organizations — poultry, swine, dairy, 4-H, FFA, conservation, etc.

4—Editorial comment on pertinent, and often controversial, subjects.

5—Recipes and homemaking tips for the women readers.

6—A source of local advertising information.

7—News coverage of local events.

8—Farmers exchange column through Mail Box Market.

9—Current Extension information of local interest.

10—Farm Calendar, an advance notice and reminder of the week's coming events.

11—Educational reports on the latest research findings at state and federal experiment stations.

12—Readers can air their individual views through "The Reader Speaks" column.

Well, there's an even dozen ways in which we feel we are performing a service to area farmers. If you feel as though you had just read a commercial "message", well, perhaps you have. But the point is, we want always to be aware of the needs of our readers, especially as those needs change. Any reasonable service which we are not now performing can be added anytime enough readers indicate its need.

Any business that is serving farmers and not meeting current needs squarely has no business to be serving farmers. The service in that case perhaps might better be called a disservice.

What Do YOU Think?

★ ★ ★ ★

Are You Government Approved?

A cartoon in this month's Pennsylvania Grange News pictures one hog saying to another which is gorging itself at the feeder — "I'm warning you, one of these days you'll have 'Government Approved' stamped all over you."

The inclination toward a mild chuckle was quickly stifled when some parallel human situations came to mind, and the unpleasant thought of "won't we all!" gave birth to this editorial comment.

The federal government (they like to spell it with a capital "F", but our constant fight is to help keep it in proper perspective) has many of those people worried who have perhaps been feeding a bit too heavily at the overflowing federal trough. You know the federal government is one of the last of the "big-time spenders" by looking at your tax bills, but when you realize that one out of every five dollars spent in the U S A is spent by Uncle Sam it is due cause for concern!

Why? Because of the tremendous pressure that this volume of concentrated "spending power" can bring to bear on its recipients. Many businessmen with juicy government contracts have so much of their total volume of business committed to UNCLE that they could not resist direct pressure without being totally destroyed. Their case is evident, but how about many of the rest of us; are we sufficiently independent from government handouts to resist the kind of pressure that could conceivably be applied to us?

The U. S Department of Agriculture propaganda campaign has often highlighted the amount of farmers' net income that is derived directly from government payments. It has been shown in some cases that those payments represented the difference between profit and loss for some farmers. How independent are they going to be?

Will the day come when we will all be wearing a "Government Approved" or a "Government Condemned" label on the seat of our pants? Perhaps it is not as inconceivable as it sounds.

What Do YOU Think?

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Patience

Lesson for September 19, 1965

Background Scripture: Galatians 6 1-10; Philippians 4, Colossians 3 12-15.
Devotional Reading: I Corinthians 13.

The bus station is crowded and the bus is late. Some of the passengers mill around but some sit quietly on a bench in the waiting room. They do not even look at the clock or ask any one how late the bus is going to be.

Dr. Foreman

We call their behavior "patient." A man stands in line at a post-office window. Somebody up front seems to be taking all morning just to pick out the prettiest stamps. But the man does not complain nor even fidget; he too is a patient man. A little boy who has been for a winter walk is being taken home by his father. The little boy is cold and hungry, but he does not cry nor complain. He is a patient child.

Empty patience

Patience is called a Christian virtue, and it is definitely named more than once in Scripture as a high quality both of men and of God. We are to "grow up in all things," writes Saint Paul. (Eph. 4:15) This includes patience, of course. But patience in the Christian meaning of the word is more than is shown by the brief examples just noted. We can call the bus-rider's patience, for instance, empty patience; the man is not doing anything. He just subsides into a lump like a cow going to sleep. He has no more interest in what goes on around him than a hibernating bear. There are other forms of empty patience. The "slow burn" is one of these. The man doing a slow burn is quiet, but you can see his face getting redder by the minute. Then finally he bursts out in a rage. He was only heating up; he was not patient for a minute. All the forms of "patience" which are no more than killing time are likewise not what the Bible means by patience.

What goes with patience?

No one good quality stands alone, as the New Testament shows and as even common sense can tell you. Beware of a man with only one virtue, the old proverb warns us. Patience is somewhat like flour for a cake. Very few cakes can be made without flour. But can you imagine a bride setting her husband down to a meal of which the dessert was a little pile of flour on a saucer? "Darling," she might say, "I didn't get to the store, so I don't have any sugar or eggs or milk or flavoring. I just made this nice little cupful of flour do for this time." (End of the honeymoon.) So a nice little cupful of patience does not make good men by itself. With other virtues combined with it, or combined to make it up, patience is indispensable to anyone whose work is with people. In the home, the school room, the supermarket, the church, patience is precisely what is needed. We have spoken of empty patience; what is full, genuine Christian patience, what are its ingredients? The reader should study carefully the lists included in the "background scripture." Three elements of patience may be pointed to; it would spoil your interest if we did not leave you to make some discoveries for yourself. One thing is compassion; literally that means suffering-with some one. Practicing the Golden Rule is one of the best ways of developing in patience. If you've no sympathy (compassion) for another, you are not likely to be or even to seem patient with him. A second ingredient is forgiveness, and a third is humility, "lest thou also be tempted" as Paul says.

When patience is a sin.

When patience—and in the Bible patience almost always refers to dealings with or between people — comes unaccompanied by compassion, forgiveness, humility and the rest, it can even become worse than empty. It can turn out even to be a sin. The wise Christian will detect the difference between good patience, the "understanding heart" able to enter into another's burdens, between this and empty patience and bad patience. Jesus is our top example here, as always in the art of living.

To File For Gas Tax Refund

Farmers using gasoline for farming operations are entitled to a refund of 4 cents per gallon of the Federal Tax paid A claim for this refund must be filed with the Internal Revenue office by September 30 Also, there is a 7 cents per gallon state tax refund available from the Penna Board of Finances and Revenue, Finance Building, Harrisburg Farmers are urged to take advantage of these refunds

To Drench Ewe Flock

Sheep producers should be sure that their breeding ewes are in a gaining condition at breeding time The elimination of internal parasites and the feeding of extra grain or real good grass pasture several weeks before the breeding time will usually result in more twin lambs. On limited pasture many flocks of sheep become contaminted with stomach worms and individual treatment is the best way of eliminating the problem.

To Care for Dairy Calves

Heifer calves that are being raised for herd replacements should be given the very best of care and attention. Special quarters including individual calf pens are strongly recommended The pens should be clean, dry, on the sunny side of the barn, and draft free. The future herd depends upon how good a job is done in growing out the heifer calves

To Seal the Horizontal Silo

Due to the good corn crop on many farms, there may be need for temporary silage storage. There are many methods of storing silage outside of a tower silo but the problem of spoilage confronts most of them. In the trench, bunker, or stack silo it is very important to chop the silage fine, pack it solid, and seal out the air within 48 hours. The black plastic materials work fine if they are held down tight on the silage and air is kept out. Special effort should be made to do this job well in order to reduce the amount of spoilage.

● SWCD

(Continued from Page 1)

central spot should be located. Several suggestions were offered, but no conclusions were reached.

The first choice was for March 8, with the 10th as an alternate choice. The names of several possible speakers for the meeting were also discussed.

Amos Funk, district chairman, in discussing various county and state plans for future development, said that many call for keeping good, number one and two agricultural land in production, but none of them spell out just how this is to be done. He also suggested that in any long range planning, he hoped the county commission would take advantage of the district's knowledge and experience.

John Kitch, state forester cooperating with the soil and water district, suggested it will not only be important to keep in close communication with the county planners but with township planners and supervisors also.

Ruben Keesee, soil conservation technician, reported on the conservation work done in the county during the month of August. There were 7 new cooperators signed; 3 landowners served, 10 land owners applying practices; 2 consultive services; 5 ACP referrels; 800 lineal feet of diversion terraces; 8 acres waterways; 3 acres pasture and hayland planting; 80 acres strip cropping; 950 lineal feet of cropland terrace; 173 acres of land adequately treated; 2 acres of cropland to grassland and 73 services provided.

Six new cooperator agreements were unanimously approved by the directors for a total of 332 acres.

● All-American

(Continued from Page 1)

Waterloo, Iowa, next month.

Another Cloister FFA Holstein winner was Daryl L Bollinger of Lititz Rd. He is the son of Mr. and Mrs. Warren F. Bollinger. He showed his senior yearling, Star Segis Osborndale, to the reserve junior championship. In last month's district show she was the junior champion.

The grand champion in the FFA Holstein event was shown by John H Weaver of Myerstown, who has taken top honors in the FFA junior show for three of the past four years. The winning animal was Swampy Hollow I Rose, which took the junior champion ribbon at the 196 show, and grand champion awards in 1962 and 196 Weaver also received award as master fitter and master showman.

Both 4-H and FFA counties were virtually shut out of the top spots in the other breed events

● Stream Map

(Continued from Page 1)

ology at Penn State, who produced it. The map took three years to prepare

Professor Higbee says the stream map is ideal for sportsmen, foresters, and workers in land-use planning and watershed associations He describes it as highly accurate for anyone desiring information about streams and landscapes of Pennsylvania. The map can be purchased for $1.00 a copy by writing to Maps, Box 6,000, University Park, Pa. 16802

Boundaries of primary and secondary watersheds are shown in addition to swamps, lakes, dams, and reservoirs.

The base map assembly was from U. S and Pennsylvania Soil Survey Maps and other unpublished surveys made from 1900 to 1963 Locations of several dams, lakes, and reservoirs were obtained through the courtesy of Army Corps of Engineers, Pennsylvania Game Commission, Pennsylvania Fish Commission, Pennsylvania Department of Forests and Waters, and the Pennsylvania State Geological Survey.

The map is about three feet high and five feet wide. Populations of towns and cities from under 250 to over 100,000 are indicated as taken from the 1960 U. S. census.

● ABC

(Continued from Page 1)

through Atlantic's service program

According to Harry Roth, Director of Breed Programs at A B C., this greatly enlarged selection results from Atlantic's membership in the United Semen Exchange group. This unique organization includes eight other A. I. Cooperatives serving dairymen in Midwestern and Southern states.

Roth says United's purposes are to increase the use of genetically superior sires, offer a broader selection of sires to dairymen in member organizations, and reduce the capital expenditures for providing this selection.

These objectives are carried out through bulk semen sales between member studs at reduced rates. Normal semen collection and processing procedures are followed by all U.S.E. studs, but only semen produced in excess of the home cooperative's needs to fill members' requests is available to other organizations.

Another feature of the Exchange organization, Roth points out, is that member studs maintain independent stud operations while working together in sire purchases and young sire proving. This way, he explains, dairymen maintain control of their local Cooperative while benefitting from the greatly enlarged selection of sires.

● Record Breaker

(Continued from Page 1)

again as the top junior two-year-old in the yearly, 2X milk division. Her 12-month lactation stands at 28,360 lbs. of milk and 870 lbs. of butterfat. This is a first place official lactation for milk on a national basis; a first for milk and third place butterfat record in California.

"Beauty" was bred by George G. Witter, of Los Angeles, California; she came into the Hollingsworth herd a few weeks before starting her double victory lactation. She was sired by Wis Captain (EX-GM) and is out of the dam Beaucrest Belle Star Rosa.

On the Holstein production leaders list for junior two-year-olds milked twice daily, "Beauty" displaces former record holder Oregon Baron Louise, owned by Oregon State University at Corvallis. Her record stood at 25,410 lbs. of milk and 970 lbs. of butterfat.

"Beauty's" ten-month lactation capped her age and milking frequency group at an even 24,000 lbs. of milk and 748 lbs. of butterfat. The new national milk records for this 2X age group were completed under DHIR production testing supervision.

STEER SHOW

The grand champion steer in the Solanco Fair baby beef show was owned by Fred Linton, Jr., of Quarryville R2, and shown by Kenneth Rutt, also of Quarryville R2.

The blocky, 1000 pound Hereford, called "Rocky" because he was bred in the Rocky Mountains of Colorado, was picked by judge Tony Dobrowsky over 35 other 4-H and FFA animals.

For the reserve title, the York County associate agricultural agent went to a 775-pound Angus named "Bo Bo" which was shown by Kathy Weaver of Quarryville R2. Kathy is the 15-year-old daughter of Mr. and Mrs. Jason Weaver.

With the exception of Linton's Hereford, all of the titles went to Angus entries. The FFA winners were Roy Anderson of Oxford R2, champion, and Bill Hollinger of Quarryville R1, reserve. The 4-H winners were Fred Linton, Jr., and Kathy Weaver, champion and reserve, respectively.

Showmanship honors went to Kathy Weaver on a close win over Bill Hollinger, but in the fitting contest Hollinger took the first and second spots with the two animals he had shown — a 4-H Hereford and an FFA Angus.

Show results:

ANGUS

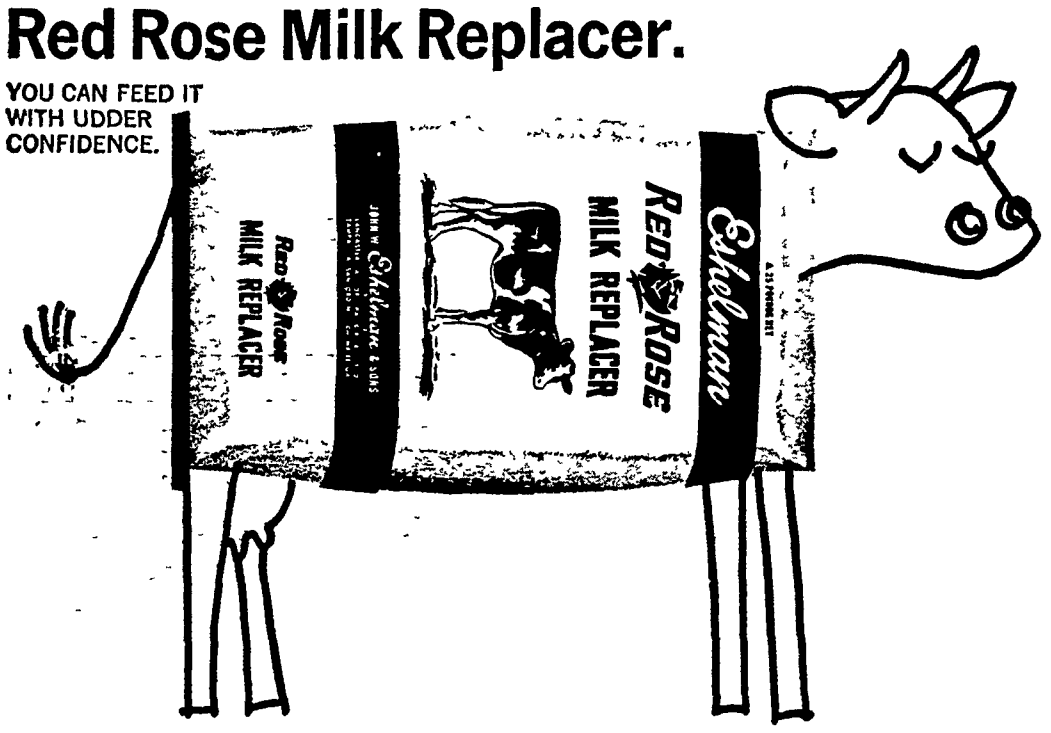
new formula
Red Rose Milk Replacer.

YOU CAN FEED IT WITH UDDER CONFIDENCE.



It takes a good calf to make a good cow. And new formula Red Rose Milk Replacer is "good cow" insurance. When you switch your calves from their first mother to their second mother (Red Rose) you won't see a weight loss. You won't see a slow down in energy. You won't see a decline in growth. You won't see anything, except a healthy calf. Just as healthy and growing as fast as if it were still on the dam's milk.

Here's what makes new formula Red Rose better than ever

1. 8% fat guaranteed.
2. More Vitamin E. Double amounts of Vitamins A & D.
3. Whole whey to supply additional lactose for energy.
4. Supplies complete nutrition and growing power for young calves.
5. Same low price. Your calves will be healthier and happier. Your milk check will get back to normal faster.

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

Do You Cook Vegetables Properly?

SPENCE

A sweet sour or Harvard sauce does more than just add flavor to beets. Acid sauces help keep the color bright red. Much of the beauty of fruits and vegetables comes from the colors And most fruits and vegetables have one of four basic types of coloring pigments These pigments are sensitive. Some are destroyed by acids, some by alkalis. So cooking methods are very important if you're going to preserve brilliant, true colors.

Potatoes, cauliflower and onions may seem to be colorless foods. But they're white because of their anthoxanthine pigments In alkaline cooking water, these vegetables turn a creamy yellow. Adding a little acid in the form of vinegar, lemon juice or cream of tartar will keep them white, but it may also keep the vegetables too firm to be palatable.

Bright green vegetables are some of the most eye-appealing foods Chlorophyll is the pigment responsible You perhaps know that green vegetables get brighter when you first put them into boiling water. But as acid from the vegetable dissolves in the water and affects the coloring matter, an olive color appears

You can dilute the acid by using more water Waterlogged vegetables, however, are nobody's favorites More importantly, you lose good amounts of minerals and vitamins in too much water The color won't change drastically if you don't overcook So use a small amount of boiling water, a covered container, and cook vegetables till just done

Carrots, tomatoes and sweet potatoes get their colors from carotinoid pigments. Neither acids nor alkalis have much effect on these coloring substances. Therefore preserving the nutrients is the main concern in cooking them. A good general policy for milk flavored vegetables is a covered pan, quick cooking, and minimum water.

Anthocyanin is a pigment common in red fruits, red cabbage and beets. Alkali, even the amount in regular tap water, may turn red cabbage blue. Beets also darken in alkaline water. Just add a little acid to the water or serve with an acid sauce and the red color will return.

" " " "

ORANGE BEETS

1 can frozen orange juice
1 can water (use juice can to measure)
¾ cup cider vinegar
1 cup brown sugar
2 tablespoons cornstarch
1 tablespoon butter
2 #2½ cans small whole beets

Moisten cornstarch and smooth to a paste using ½ of the water. Mix all other ingredients except butter and beets Bring to a boil and add the cornstarch; stir to prevent lumping. Cook until clear and thickened; add butter; then add beets and heat thoroughly. Serves 6.

" " " "

CRUNCH-TOP POTATOES

⅓ cup butter or margarine
3 or 4 large baking potatoes, pared
¾ cup crushed corn flakes
1½ cups shredded sharp cheese
2 teaspoons salt
1½ teaspoons paprika

Melt butter in jelly-roll pan in 375 degree oven. Place single layer of potatoes, cut crosswise in ½-inch slices, into pan; turn once in butter. Mix remaining ingredients; sprinkle over potatoes. Bake in 375 degree oven for 30 minutes, until crisp on top. Makes 4 servings.

" " " "

SKILLET SUPPER

8 small new potatoes, scraped
3 medium carrots, scraped and halved, crosswise
1 teaspoon salt
1 1-pound head cabbage, quartered
¼ teaspoon salt
1 can (12-ounces) corned beef, quartered
¼ cup melted butter or margarine
⅓ cup snipped parsley
⅓ cup mayonnaise
1 tablespoon prepared mustard
1 tablespoon drained prepared horse-radish

In large skillet, place ½-inch water; heat to boiling. Add potatoes, carrots and 1 teaspoon salt; cover; cook for 10 minutes; push potatoes and carrots to side of skillet; place wedges of cabbage in bottom of skillet; sprinkle with ¼ teaspoon salt. Cook, covered, for 10 to 15 minutes, or until cabbage is almost tender. Top with quartered corned beef, cook, covered, 5 minutes. Drain, if necessary; pour melted butter or margarine over all. Sprinkle with parsley. Serves 4. Serve with Mustard Sauce made by com-

ing mayonnaise, mustard horse-radish.

* * * *

EEN BEAN MARINADE

packages frozen green beans
¾ teaspoon salt
¼ cup water
½ cup French dressing
⅓ cup pimiento, cut into thin strips
1 small onion, finely chopped
⅛ teaspoon pepper
2 eggs, hard cooked

Cook frozen beans in water for about 15 minutes or until just tender; drain thoroughly. While hot, combine with French dressing, pimiento, onion and pepper. Chill thoroughly. Serve on crisp lettuce, garnished with slices of hard-cooked eggs. Serves 6.

* * * *

GREEN BEANS EN CASSEROLE

2 packages frozen green beans
¼ cup salad oil
2 medium onions
Few sprigs parsley
1 clove garlic
¼ cup cottage cheese
½ cup grated Cheddar cheese
4 eggs, slightly beaten
1 teaspoon salt
Dash pepper
1 cup soft bread crumbs

Cook frozen beans according to package directions; drain. Heat salad oil in saucepan; stir in chopped onions and cook until tender. Remove from heat; stir in chopped parsley, crushed garlic, cottage cheese, Cheddar cheese, eggs, salt, pepper and bread crumbs; mix well. In greased medium-sized casserole, arrange a layer of beans; cover with half the cheese mixture, another layer of beans and a final layer of the cheese mixture. Bake in 350 degree oven for about 20 minutes until golden. Makes 6 servings.

Tips On Thawing Frozen Fruits

You get the best color and flavor from frozen fruit if you leave it in the sealed container to thaw.

Serve the fruit as soon as thawed — a few crystals in the fruit improve the texture for eating raw.

You can thaw frozen fruit in the package in the refrigerator, at room temperature, or in a pan of cool water Turn the package several times for more even thawing.

Allow six to eight hours on a refrigerator shelf for thawing a one-pound package of fruit packed in syrup. For the same size package, allow two to four hours for thawing at room temperature and a half to one hour for thawing in a pan of cool water.

Fruit packed with dry sugar thaws slightly faster than that packed in sirup. Both sugar and sirup packs thaw faster than unsweetened packs. Thaw only as much fruit as you need at one time. But if there is leftover thawed fruit, cook it. The cooked fruit will keep for a few days in the refrigerator.

Did You Know That

About 15 percent of all pesticides sold are bought for home use and garden use, according to the United States Department of Agriculture.

When you donate an article of clothing which you know you'll never use again, but is still in good condition, that it's true generosity to take the time to mend, wash, and iron it.

PRESSURE CHLORINATOR AND CHEMICAL FEEDER FOR WATER PURIFICATION & TREATMENT

DESIGNED

With pumping cycle and feed rate best suited for independent water supply systems

To use full strength chlorine solutions without dilution; no clogging or messy mixing.

For quick, sure starts under full load; service cycle on-off, or continuous duty

For easy priming, freedom from vapor locks, accurate adjustment.

BUILT

With the precision and high quality necessary in equipment for use in health protection

For freedom from service . . . accurate feed adjustment.

With heavy duty motor, drive, and needle bearings, all sealed in oil for wear-proof, long life.

100% bench tested for reliable performance. Full year guarantee.

Stauffer Bull Takes Reserve Titles At B&W

The highlight of Tuesday's All-American Dairy Show was the 12th annual Pennsylvania Black and White Show. Local winners were in short supply in this highly competitive event, but Clarence Stauffer of Ephrata captured reserve senior and reserve grand championships with his bull Sunny Craft Dean Captain. His animal placed second all the way to the five-year-old entry of Blair County's Richard Frederick, the defending champion.

The junior champion bull was Fairwood Reflector Duke, owned by J. A. and W. D. Fairchild and Frederick C. Hack, of Berwick, Columbia County. The Fairchilds won the same title last year Raymond A Seidel, of Virginville, Berks County, won the reserve junior title with his Kerchenhill Shamrock

Orton and Duane Mattocks, of Troy, Bradford County, showed the grand champion and senior champion female, a four year-old cow, Mattocks Farm Diplomat Floreen

Reserve grand champion and reserve senior champion female honors went to Allen Dairy Farms, Inc, Mechanicsburg, Cumberland County

The junior champion female was shown by John M Umble, of Atglen, Chester County, and the reserve title went to Creedin C Cornman, Carlisle, and Clarence Cornman, Jr, of Newburg, Cumberland County

Both the premier breeder and premier exhibitor awards were won by Mechanicsburg entries, H Wayne Locke and Allen Dairy Farms, respectively

Also highlighting Tuesday's program was a Guernsey sale, second of three scheduled at the All-American Holsteins were sold Monday night, and Jerseys go on sale at 12 30 p m. Wednesday.

A foreign visitor, L F V Saint-Paul, a dairyman from Oberbayern, West Germany, found the All-American Dairy Show "amazing" He was especially impressed to see "so many fine animals under one roof at one time"

"Make It With Wool" Contest Set For Nov.

Pennsylvania young women and girls soon will be competing in a "Make It With Wool" contest that will be serving an added purpose as a distaff aid to agriculture, according to State Agriculture Secretary Leland H Bull

Only American loomed knitted or felted, 100 percent wool may be used in fashioning garments that are to be judged in district, state and national competition

Secretary Bull said the state's sheepmen produce nearly 1,500,000 pounds of wool annually, and that the contest will help to stimulate this phase of the Commonwealth farm program

Closing date for entering the competition is Nov 6. Twelve district roundups will be held Nov 12-20, and the state finals, Nov 26-27 in Harrisburg Mrs Dick M Coons, York R3, is state director

12 Forage Harvester

Fewer trips through the field . . . half the number of turns . . . and less field packing —that's what a 2-row unit for the heavy-duty John Deere 12 Forage Harvester will do for you.

The PTO- or engine-driven 12 is also available with a heavy-duty 1-row unit, 6- or 7-foot mower bar, and a windrow pickup. Stop in soon—get all the facts on the 12 Forage Harvester.

NORMAN M. MARTIN

Grimes Poultry Names Officers

It was recently announced that new officers had been named for the Grimes Poultry Processing Corporation of Fredericksburg, Pa They are: Allen B Graybill, president; Donald Horn, vice-president; Ernest O Horn, Jr., secretary, and Robert B Graybill, treasurer.

The Grimes plant was recently acquired on a fifty-fifty basis by D. E. Horn & Co. and Miller & Bushong, Inc. The new officers are representatives of the two feed companies. The plant was purchased to assure a processing home for the broilers grown by the two companies

In addition Allen B Graybill has been named general manager of the Grimes Co Eugene Bailey, who will continue as sales manager, and will also serve as plant manager Henry Gerhart, a veteran employee of the Grimes Co will continue as assistant salesmanager and traffic manager Ralph Needmyer will continue as plant superintendent

Survey Group Predicts Egg And Turkey Prices Up, But Broilers Down

The Poultry Survey Committee is predicting that U S farm turkey prices during September December will average above year earlier levels and that the U S farm egg prices for the twelve month period beginning October 1 are likely to average about one cent per dozen above last year U S farm broiler prices will continue to decline through 1965, the Committee says, with severely depressed prices expected before mid-1966

The Poultry Survey Committee is co-sponsored by the American Feed Manufacturers Association and the National Turkey Federation It meets quarterly and makes predictions on turkey, egg and broiler prices The Committee is composed of Dr Ralph L Baker Ohio State University; Dr Olan D Forker, University of California; Dr William R Henry, North Carolina State College; Dr Richard L Kohls Purdue University, and Dr Henry Larzelere, Michigan State University Economists from industry and USDA serve ex officio
